

Environmental Policy

We are committed to delivering market-leading performance on key environmental issues in our business, with our customers, our supply chain and our end consumers.

To achieve this:

- We will exceed our customers' expectations in key areas of environmental performance.
- We will help to grow our business and deliver benefits through sustainable innovation.
- We will develop and implement a sustainability framework aligned with our business strategy.
- Objectives will be set to continuously improve efficiency and performance against environmental measures including climate change, packaging, biodiversity, waste reduction, water use and preventing pollution.
- We will train and talk with our workforce to ensure employees have the opportunity to be involved in environmental improvement.
- All our sites will be good neighbours and we will aim to have a positive impact within local communities.
- We will promote sharing of knowledge and good practice between our sites and with our customers, suppliers and peers.
- We will meet all our relevant legal requirements and talk with our customers, regulators, applicable NGOs and stakeholders to ensure we are positive advocates for first-class environmental standards.
- The company will implement reporting and assurance processes, making public our performance and reporting our progress against objectives.

Achieving these goals will help us continually improve business performance, ensuring that we are known for delivering high quality food and for meeting our environmental responsibilities.

A Winning Business – The Right Environment
